

IAN ALLOWAY

Machine Learning Engineer · Data Scientist

727-470-8666 · ian@allowayllc.com · Remote (US) · ianalloway.xyz · github.com/ianalloway · linkedin.com/in/ianit

SUMMARY

ML engineer with a B.S. in Information Science (USF, May 2026) and incoming M.S. in Artificial Intelligence (USF, Aug 2026). Founder of Alloway LLC; built and deployed a production sports-analytics platform and published open-source ML libraries on PyPI and npm. Focused on applied modeling, evaluation/backtesting rigor, and shipping inspectable, measurable systems.

EDUCATION

University of South Florida — M.S., Artificial Intelligence

Incoming, Aug 2026

University of South Florida — B.S., Information Science (GPA: 3.5)

May 2026

EXPERIENCE

Founder & ML Engineer — Alloway LLC (remote)

2020 – Present

- Built and deployed AI Advantage (aiadvantagesports.com): a live sports-betting analytics platform serving ML predictions for NBA/NFL/MLB with Kelly-criterion bet sizing and a real-time odds ticker (TypeScript, Python, FastAPI, React).
- Developed and backtested NBA/NFL edge-detection models using logistic regression, XGBoost, and ensemble methods; emphasized probability calibration and closing-line-value (CLV) evaluation over raw accuracy.
- Published open-source libraries: `nba-edge` (PyPI — Elo ratings, win probability, Kelly helpers) and `kelly-js` (zero-dependency TypeScript package for Kelly sizing, odds conversion, CLV tracking, and Monte Carlo bankroll simulation).
- Write about ML systems and applied AI at allowayai.substack.com.

AI Training Contractor — Handshake AI (contract, remote)

- Contract work on AI model training and evaluation projects.

Intern — The Recording Academy (GRAMMYS)

Intern — U.S. National Park Service

PROJECTS

sports-betting-ml — applied ML modeling (Python)

github.com/ianalloway

- End-to-end pipeline for NBA/NFL game prediction: feature engineering, model comparison (logistic regression vs. XGBoost vs. ensembles), and honest backtesting with documented results.

ian-web-forge — portfolio platform (TypeScript)

ianalloway.xyz

- Personal site with project showcase, live RSS integration, and deployed CI/CD workflow.

SKILLS

Languages: Python, TypeScript/JavaScript, SQL, R

ML & Data: scikit-learn, XGBoost, pandas, model calibration, backtesting, Monte Carlo simulation, A/B evaluation

Engineering: FastAPI, React, REST APIs, Git/GitHub, CI/CD, cloud deployment, package publishing (PyPI, npm)
